

Through Appreciating Earth I foster environmental awareness, scientific knowledge, & planetary appreciation. We all consciously & unconsciously change the environment, Earth education helps us understand how we impact our planet.

**Join me to Appreciate Earth!**

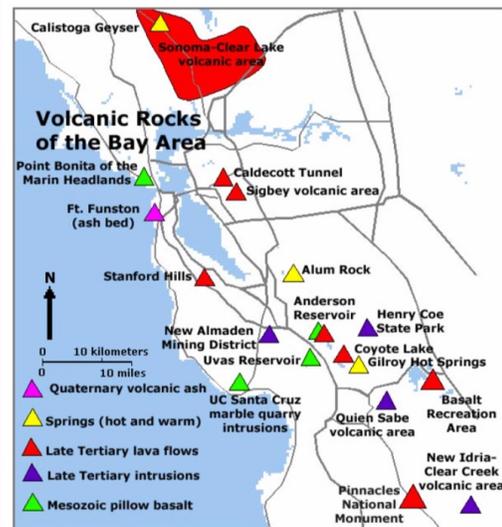

*Awareness is a prelude to respect, projected into the world as appreciation*

**Volcanic Planet:**  
**San Francisco Bay Area**  
**Volcanic Rocks**

Join me and the **San Francisco Gem & Mineral Society** this Friday, September 2nd at 7pmPST via Zoom. I will be presenting an ~1hour geology talk focused on Earth as a volcanic planet, and the San Francisco Bay Area volcanism of the past.

- How is Earth a volcanic planet?
- What kinds of volcanic rocks are found in this region?
- Why are there so many volcanic rocks in the Bay Area?
- What kinds of eruptions occurred?
- Will there be more eruptions in the future?

**[Click here to register for Friday's 9/2 meeting at 7pm \(free\)](#)**

Map showing the location of volcanic rocks in the San Francisco Bay region.

**Upcoming Appreciating Earth Geology Walks**

Only for Appreciating Earth members! Learn about time, rocks & Earth evolution in Sonoma County

**Geology of Sonoma Valley  
Regional Park in Glen Ellen**

**Sunday, September 25th**

10:00am-1:00pm

\$36 per person paid online in advance

7 people max

### Fall 2022 Geology Walks...

October 22nd - Crane Creek Regional Park Geology  
November 18th - Helen Putnam Regional Park Geology  
December 16th - Sonoma Mountain Regional Park Geology

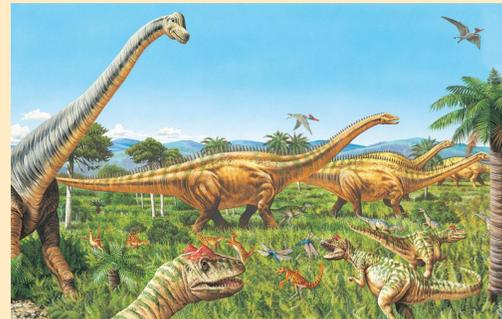

### OLLI Fall 2022 at SSU

For those 50 years or better who love to learn  
*No homework or exams*

**The Age of the Reptiles**  
**Fridays 1-3pm via ZOOM!**  
**September 16th - October 21st**

*Recordings will be available each week*

For more than 180 million years reptiles ruled the Earth, dominating the land, sky and seas. Dinosaurs lived alongside Pterosaurs & Marine Reptiles while small mammals evolved underfoot.

As the climate changed and the environment evolved, reptiles diversified into amazing creatures that include the largest land animals to ever evolve, massive marine predators, and flying reptiles with wingspans up to 40ft. Today, paleontological studies are unearthing new and exciting information about Mesozoic life at incredibly fast rates...

**Fall registration open now!**
